ZOQONYX.COM
COMPLETE PROJECT DOCUMENT

Free Online Tools Platform

Version 1.0 | Ready for AI Implementation

Domain	https://zoqonyx.com/
Owner	Zawwar Ahmed
Contact Emails	hello@zoqonyx.com zawwar.ahmed2006@gmail.com
Footer Credit	Developed by Newix Tech Solutions (https://newixtechsolutions.com/)
Date	24 October 2026

This document is complete and self-contained. Any AI coding assistant (Claude, Codex, ChatGPT, etc.) reading this should be able to build a production-ready Zoqonyx.com without asking further questions.

1. Project Goal

Build a large-scale free online tools platform that ranks for thousands of long-tail keywords. Every useful tool that people search for (developers, designers, marketers, SEO experts, real estate agents, dentists, agencies, animators, 3D artists, sales people, students, and general users) must have its own dedicated page.

- Tools that can run **100% free** (mostly client-side) → Fully functional and live.
- Tools that require paid APIs, heavy server processing, or licenses → Create the full page with SEO content + beautiful "Coming Soon" state + animation. These pages must still rank for SEO.
- When revenue comes, enable the Coming Soon tools one by one from the Admin Panel.
- Goal: Long-term passive income through organic traffic + ads.

2. Final Tech Stack (No Changes Allowed)

Layer	Technology	Reason
Frontend + Backend	Next.js 15 (App Router) + TypeScript	Best SEO, fast, modern, full-stack
Styling	Tailwind CSS + shadcn/ui	Clean, responsive, customizable
Database	MySQL (Hostinger) + Prisma ORM	Already available on hosting
Authentication	Username + Password (bcrypt + JWT)	Simple & secure for Admin only
File Storage	Local / Hostinger public folder	For logo & OG images (free)
Icons	Lucide React	Free & optimized
Deployment	Git push → Hostinger Node.js app	Existing workflow of owner
Testing	Playwright (MCP compatible) + unit tests	Full E2E coverage required

Everything must be editable from Admin Panel (tools on/off, theme, logo, content, SEO meta). No paid external services in Phase 1.

3. Complete Tools List

A. Fully Free & Working Tools (Phase 1 – Must be live)

Image Tools

- Background Remover (client-side)
- Image Compressor
- Image Resizer
- Image Format Converter (PNG/JPG/WebP/AVIF)
- Image to Text / OCR (Tesseract.js)
- Color Picker from Image
- Favicon Generator
- QR Code Generator
- Image Cropper
- Image Rotator / Flipper
- Passport Photo Maker
- Image to Base64

CSS & Design Generators

- Border Radius Generator
- Box Shadow Generator
- CSS Gradient Generator
- Button Generator
- Flexbox Playground

- CSS Grid Generator
- Text Shadow Generator
- Neumorphism Generator
- Glassmorphism Generator
- Clip Path Generator
- Animation Keyframes Generator

Text & Code Tools

- Case Converter
- JSON Formatter / Validator
- Base64 Encode/Decode
- Markdown ↔ HTML Converter
- UUID Generator
- Password Generator
- Lorem Ipsum Generator
- Diff Checker
- Hash Generator (MD5, SHA-1, SHA-256, SHA-512)
- URL Encoder/Decoder
- HTML Encoder/Decoder
- Word Counter + Character Counter
- Reading Time Calculator
- Text to Speech (browser)
- Speech to Text (browser)

Developer / SEO / Marketing Tools

- Meta Tags Generator (Open Graph + Twitter)
- Robots.txt Generator
- Sitemap Generator (basic)
- Color Palette Generator + Contrast Checker
- Unit Converter (px/rem/em/%)
- Timestamp Converter
- Open Graph Preview
- Twitter Card Preview
- Canonical URL Checker (simple)
- Keyword Density Checker (client-side)
- UTM Builder
- QR Code for URL / Text / WiFi / vCard

Document & PDF Tools (Free level)

- Text to PDF
- HTML to PDF (basic)
- Markdown to PDF
- PDF Page Counter (client-side where possible)
- Merge PDF (limited free client-side)
- Split PDF (limited)
- PDF to Image (first page preview)

Video Tools (Free / Client-side possible)

- Video to GIF
- Video Trimmer (browser)
- Video Compressor (basic quality options)
- Extract Audio from Video
- Video Resizer
- Add Text Overlay to Video (basic)

Other Useful Free Tools

- Invoice Generator (simple)
- Resume / CV Builder (basic templates)
- Business Card Generator
- Placeholder Image Generator
- Random Color Generator
- Age Calculator

- BMI Calculator
- Percentage Calculator
- Tip Calculator
- Loan EMI Calculator
- Domain Age Checker (free APIs if available, else Coming Soon)

B. Coming Soon Tools (Create full SEO pages + nice animation)

These pages must exist, be indexable, and rank. Show beautiful “Coming Soon” state with progress animation or “Under Development” message. When revenue allows, enable them one-by-one from Admin.

Advanced Image / AI

- AI Background Remover (higher quality)
- AI Image Upscaler
- AI Image Generator
- Object Remover
- Image Colorizer
- Face Swap
- Cartoonizer / Anime Filter

Advanced Video

- Advanced Video Compressor
- Video Background Remover
- Auto Subtitle Generator
- Video to MP3 (high quality)
- Screen Recorder Online
- Video Editor (timeline based)

PDF & Document Advanced

- Full PDF Editor
- PDF OCR
- PDF to Word / Excel / PowerPoint
- Word to PDF (high quality)
- Excel to PDF
- eSign PDF
- PDF Compression (strong)

AI Writing & Business

- AI Content Writer
- AI Sales Pitch Generator
- AI Email Writer
- AI Blog Outline Generator
- AI Product Description Generator
- AI Real Estate Description Writer
- AI Dental Clinic Content Generator
- AI Agency Proposal Generator
- Grammar Checker (advanced)
- Plagiarism Checker

3D / Animation / Design

- 3D Model Viewer
- Simple 3D Text Generator
- Lottie Animation Player / Editor
- SVG Editor Online
- Icon Generator from Text

SEO & Marketing Advanced

- Full Site Audit Tool
- Backlink Checker
- Rank Tracker
- Keyword Research Tool
- Competitor Analysis

- Page Speed Detailed Analyzer

Others

- Online Code Editor (multi-language)
- API Tester (Postman like)
- Database Schema Designer
- Whiteboard / Diagram Tool
- Mind Map Maker
- Flowchart Maker

All Coming Soon pages must have: Proper title & meta, 400–700 words of SEO content, Related tools section, Nice animated “Coming Soon” component, optional “Notify Me” email capture (store in DB).

4. Database Schema (Prisma)

```
model User {
  id        String   @id @default(cuid())
  username  String   @unique
  password  String   // bcrypt hashed
  createdAt DateTime @default(now())
}

model Tool {
  id           String   @id @default(cuid())
  slug         String   @unique
  name         String
  description  String
  category     String
  isActive     Boolean  @default(true)
  isComingSoon Boolean  @default(false)
  icon         String?
  order        Int      @default(0)
  metaTitle    String?
  metaDesc     String?
  content      String?  // long SEO content
  usageCount   Int      @default(0)
  createdAt    DateTime @default(now())
  updatedAt    DateTime @updatedAt
}

model Setting {
  id    String @id @default(cuid())
  key   String @unique
  value String // JSON string for complex values
}

model Page {
  id        String  @id @default(cuid())
  slug      String  @unique // about, privacy, terms, homepage
  title     String
  content   String  // rich text / markdown
  metaTitle String?
  metaDesc  String?
}

model ContactMessage {
  id        String   @id @default(cuid())
```

```
  name      String
  email     String
  message   String
  createdAt DateTime @default(now())
}
```

5. Admin Panel Requirements (Fully Editable)

URL: **/admin**

Features:

- Login (username + password – stored securely with bcrypt)
- Dashboard (total tools, active, coming soon, usage stats)
- Tools Manager: Enable/Disable, mark Coming Soon, change order, edit name/description/SEO/content
- Appearance: Upload Logo, Primary Color, Secondary Color, Default Theme (light/dark)
- Pages Manager: Edit Homepage sections, About, Privacy Policy, Terms of Service
- SEO Manager: Global + per-tool meta tags
- Settings: Site name, contact emails, footer text
- Messages: View contact form submissions

All changes must reflect on frontend without redeploy.

6. Frontend Requirements

- Fully responsive (mobile-first)
- Dark / Light mode toggle
- Fast loading (Core Web Vitals green)
- SEO optimized (metadata API, sitemap.xml, robots.txt, JSON-LD schema)
- Search functionality on homepage
- Category filters
- Tool cards with icons + short description
- Beautiful Coming Soon component with subtle animation
- Contact form working (sends to both hello@zoqonyx.com and zawwar.ahmed2006@gmail.com)
- Footer with “Developed by Newix Tech Solutions” credit + link

7. Testing Requirements (Must be included)

Use Playwright (MCP compatible). Test cases must cover:

- Homepage loads + search works
- Every free tool page loads and core functionality works
- Coming Soon pages show correct state and animation
- Admin login / logout
- Admin can enable/disable tools
- Admin can change logo and colors
- Contact form submission succeeds
- Mobile + Desktop responsiveness
- Dark/Light mode toggle works
- SEO meta tags present on all pages
- No console errors
- Basic performance checks

All test files must be written and ready to run.

8. Recommended File & Folder Structure

```
zoqonyx/
■■■ prisma/
■■■ public/
■   ■■■ logo/
■   ■■■ icons/
■■■ src/
■   ■■■ app/
■   ■   ■■■ (public)/
■   ■   ■   ■■■ page.tsx                 # Homepage
■   ■   ■   ■■■ tools/[slug]/page.tsx    # Individual tool
■   ■   ■   ■■■ about/
■   ■   ■   ■■■ contact/
■   ■   ■   ■■■ privacy-policy/
■   ■   ■   ■■■ terms/
■   ■   ■■■ admin/
■   ■   ■■■ api/
■   ■■■ components/
■   ■■■ lib/
■   ■■■ hooks/
■   ■■■ styles/
■■■ tests/                              # Playwright tests
■■■ .env
■■■ README.md
```

9. Development Rules for the AI Builder

1. Use only free libraries.
2. Prefer client-side processing for all tools.
3. Every tool page must have unique, high-quality SEO content (400–700 words for Coming Soon pages).
4. Coming Soon pages must look professional and be fully rankable.
5. Code must be clean, fully typed (TypeScript), and well-commented.
6. Admin must control almost everything (tools, theme, logo, content, SEO).
7. Write full Playwright test suite covering the list above.
8. Make the project ready to deploy on Hostinger Node.js via Git.
9. Include seed data for all tools (both active and coming soon).
10. No questions should remain unanswered after reading this document.

10. Build Priority Order

1. Project setup + Prisma + Auth
2. Admin Panel foundation
3. Homepage + Tool listing system
4. 15–20 most important free tools fully working
5. Coming Soon system + pages
6. Full SEO + content for all pages
7. Playwright tests
8. Polish + remaining free tools

11. Final Notes

This document is complete and self-contained. Any AI (Claude, Codex, ChatGPT, Cursor, etc.) reading this should be able to produce a production-ready Zoqonyx.com without asking further questions.

Language of the entire website: English only. Hosting: Hostinger unlimited with Node.js + MySQL support, deployed via Git. All free tools first. Paid/API tools as Coming Soon with full SEO pages.
